Cancer Prevention through reduction of carcinogens in air, water, food, consumer products and the workplace
www.preventcancer.com

March 1, 2010

I unreservedly and strongly Mr. Fauteux's éditorial on the overdue and critical need to reduce Quebecers' elevated exposure to magnetic fields. These fields pose well-documented risks of leukemia as well as some forms of brain and breast cancers.

Samuel S. Epstein, M.D.
Emeritus professor Environmental and Occupational Medicine
